CSTAM 3.0

OliveSoft

From public tender to commercial proposal

Team
Intgrale IT

Event
CSTAM 3.0

— 01

The problem

Manual monitoring of portals

Scattered knowledge

Proposals written from scratch

02

The proposed solution

Detect

01

Research

02

Compare

03

Decide

04

Generate

05

— 03

The architecture

Interface

- Next.js
  Vercel

Logic

- n8n
  Azure

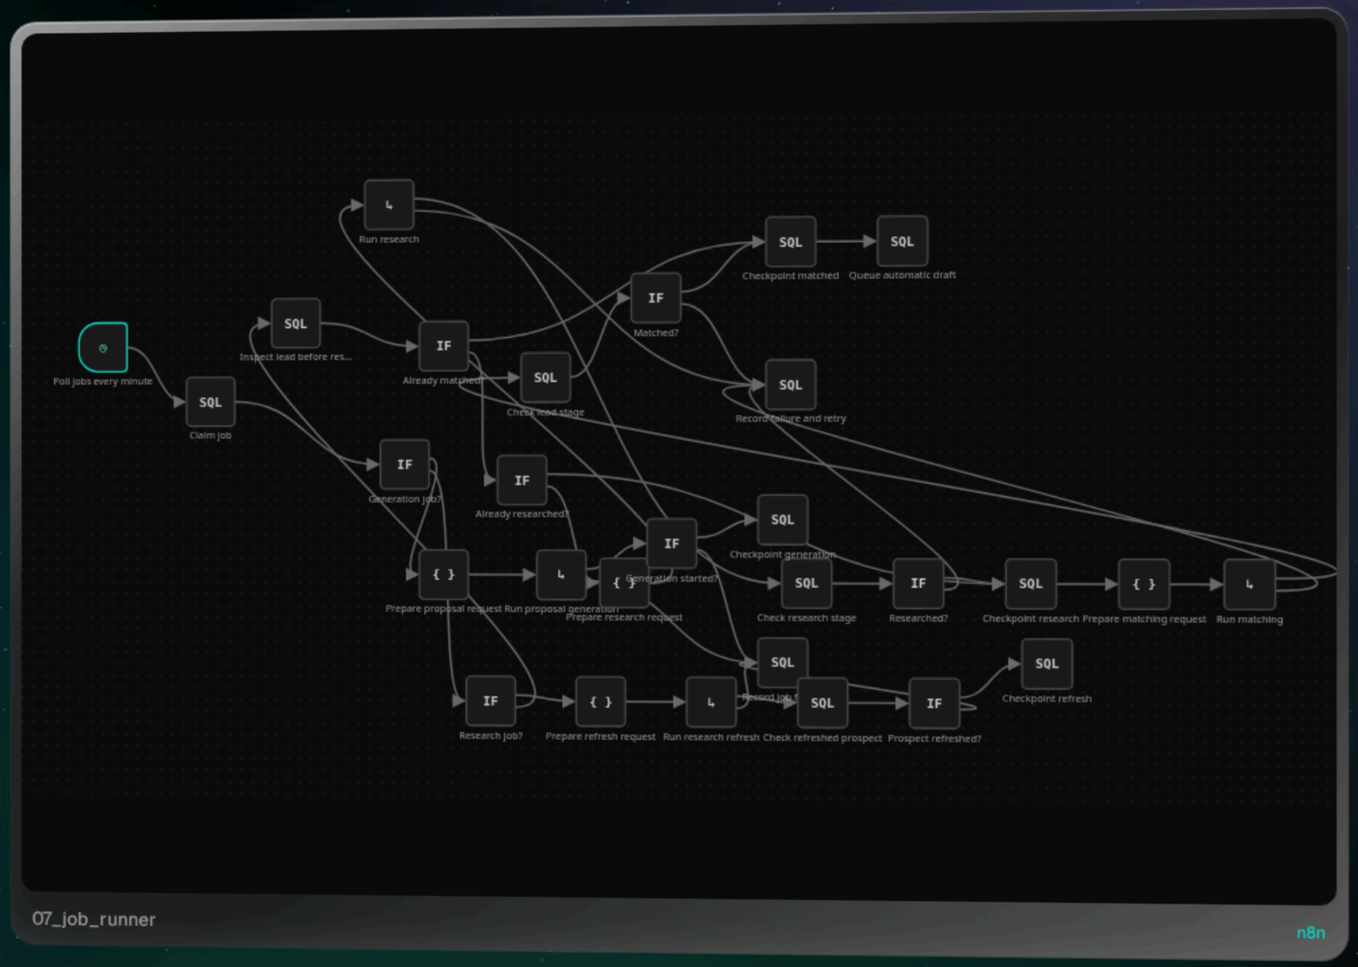

Data and AI

- Supabase
  PostgreSQL and Storage
- Qdrant
- Gemini
- DeepSeek
- Tavily
- Renderer
  PPTX / PDF
- Canva

— 04

The n8n workflow

- **29** workflows
- Durable job queue
- Automatic recovery

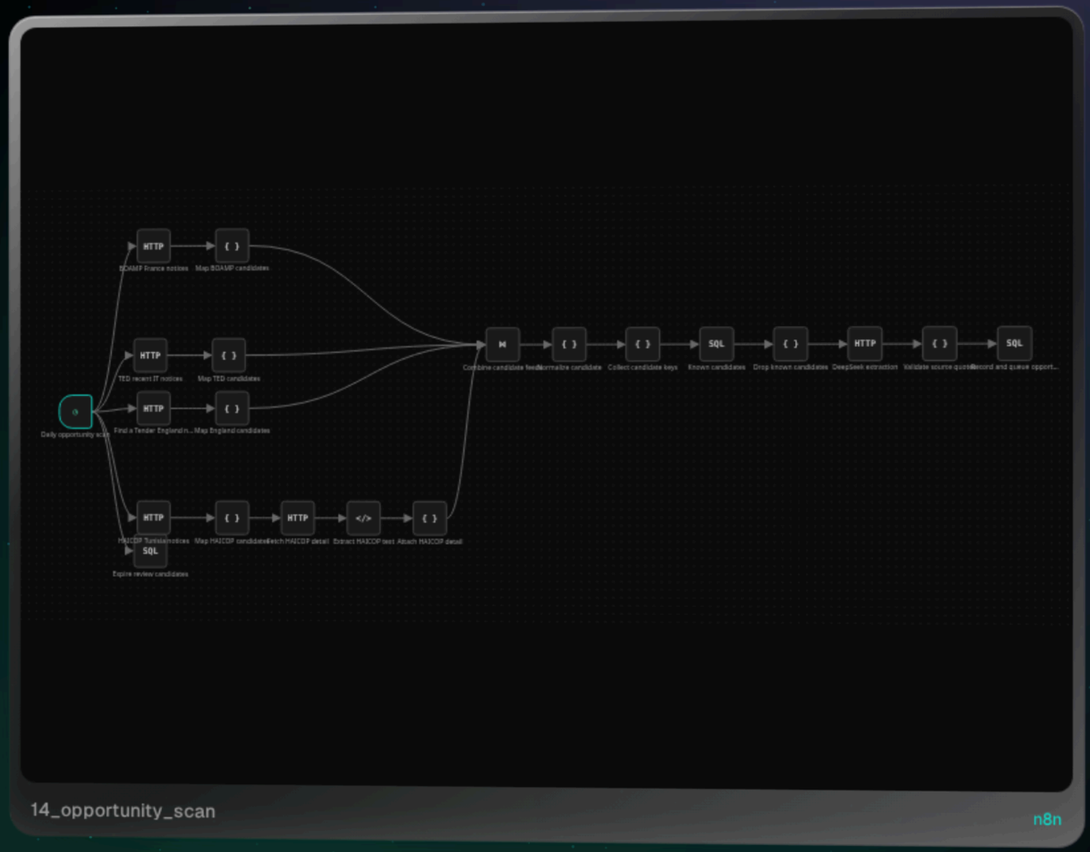

— 05

Collecting tenders

	SOURCE	COUNTRY	METHOD
TED	TED	Europe / France	API
BO	BOAMP	France	API
FTS	Find a Tender	United Kingdom	OCDS API
HA	HAICOP	Tunisia	HTML scraping

99 Exact quote required

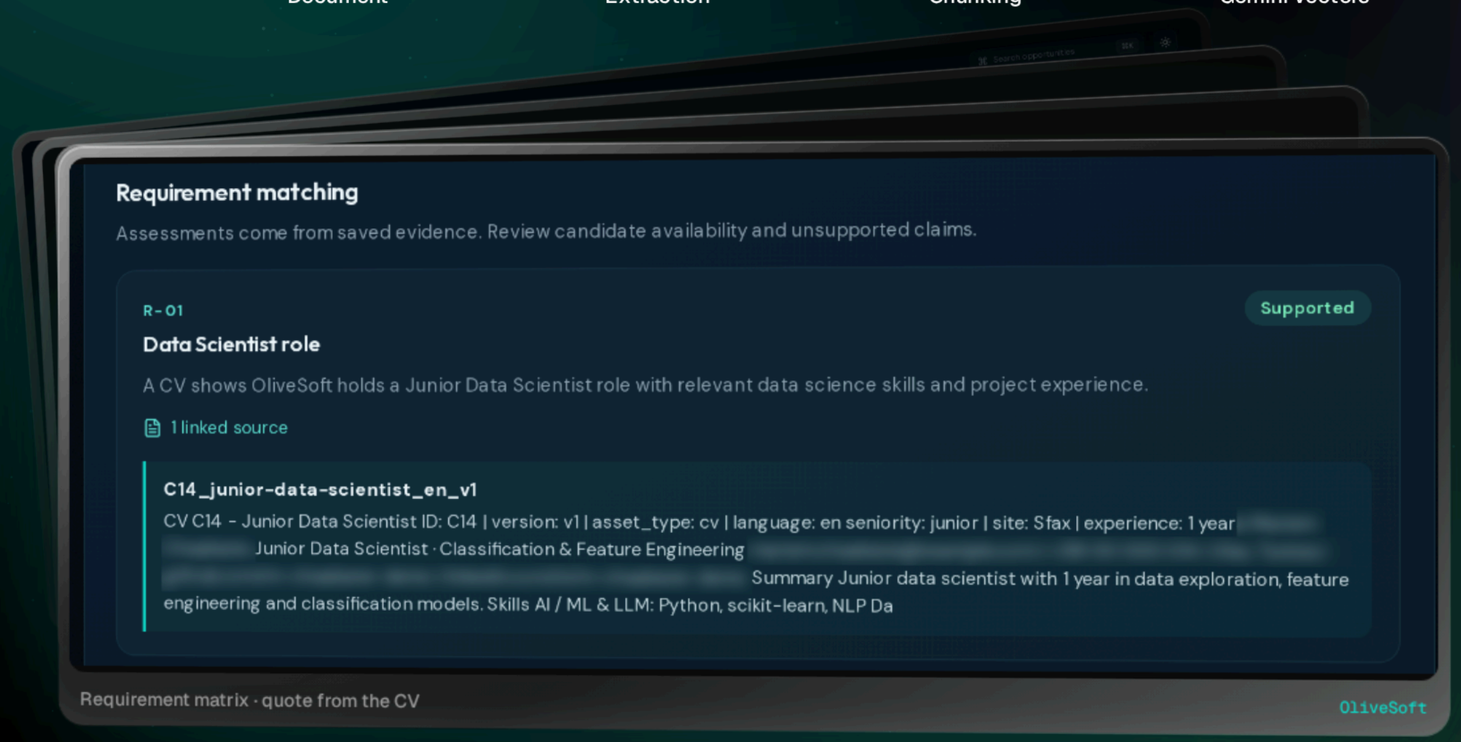

14_opportunity_scan n8n

— 06

Comparing with our knowledge base (RAG)

Document → Extraction → Chunking → Gemini vectors → Qdrant → Top 5 → LLM judgment + quote

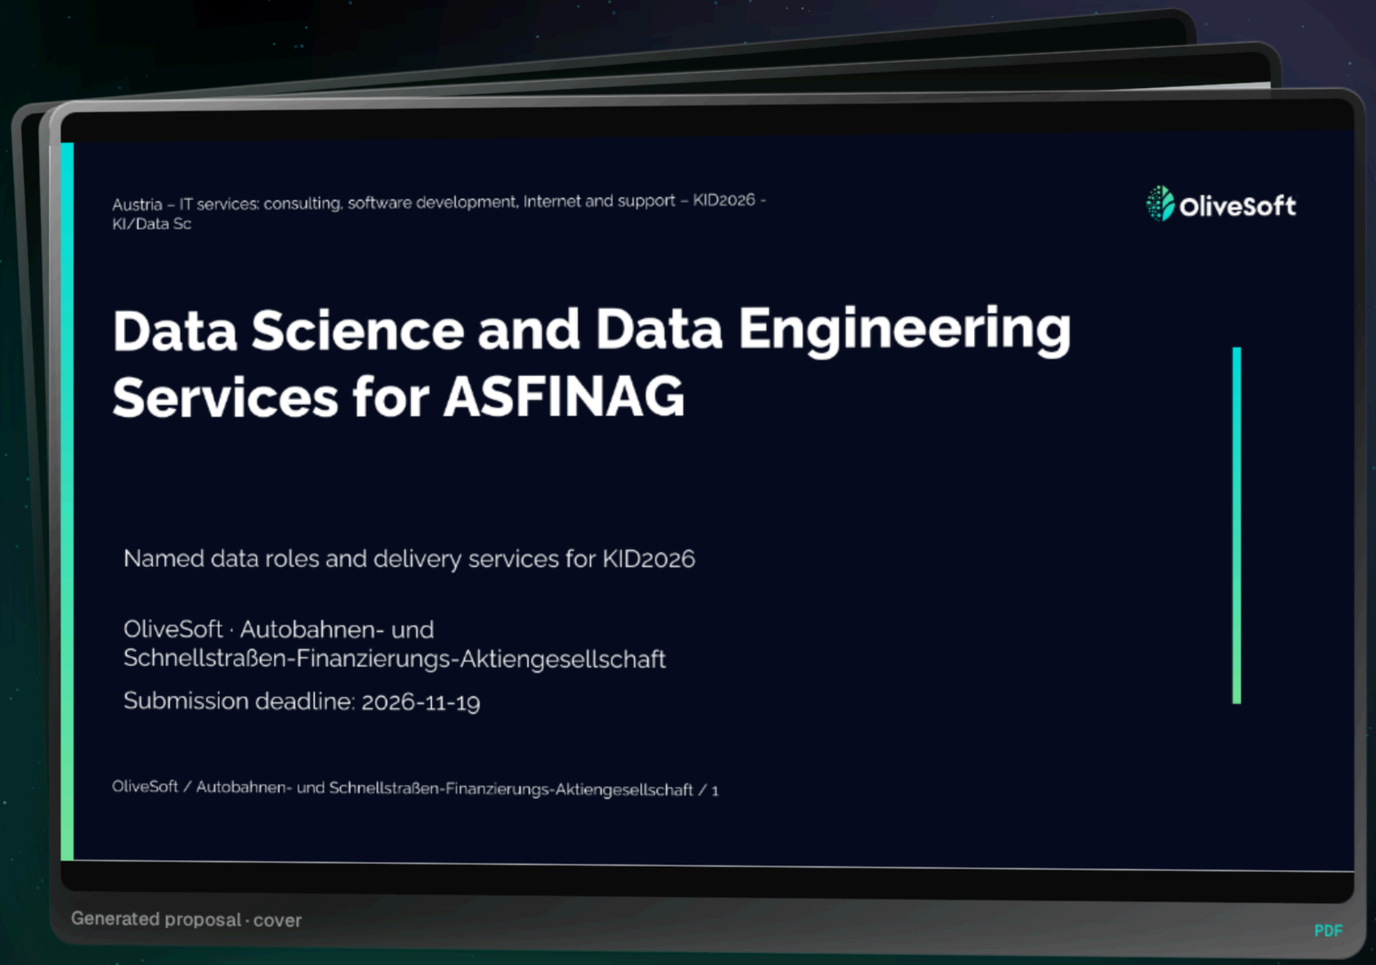

hit@5	1.00
recall@5	0.83
correct judgments	83%

07

Generating the presentation

- 2 AI agents
- Source validation
- Editable PPTX + PDF

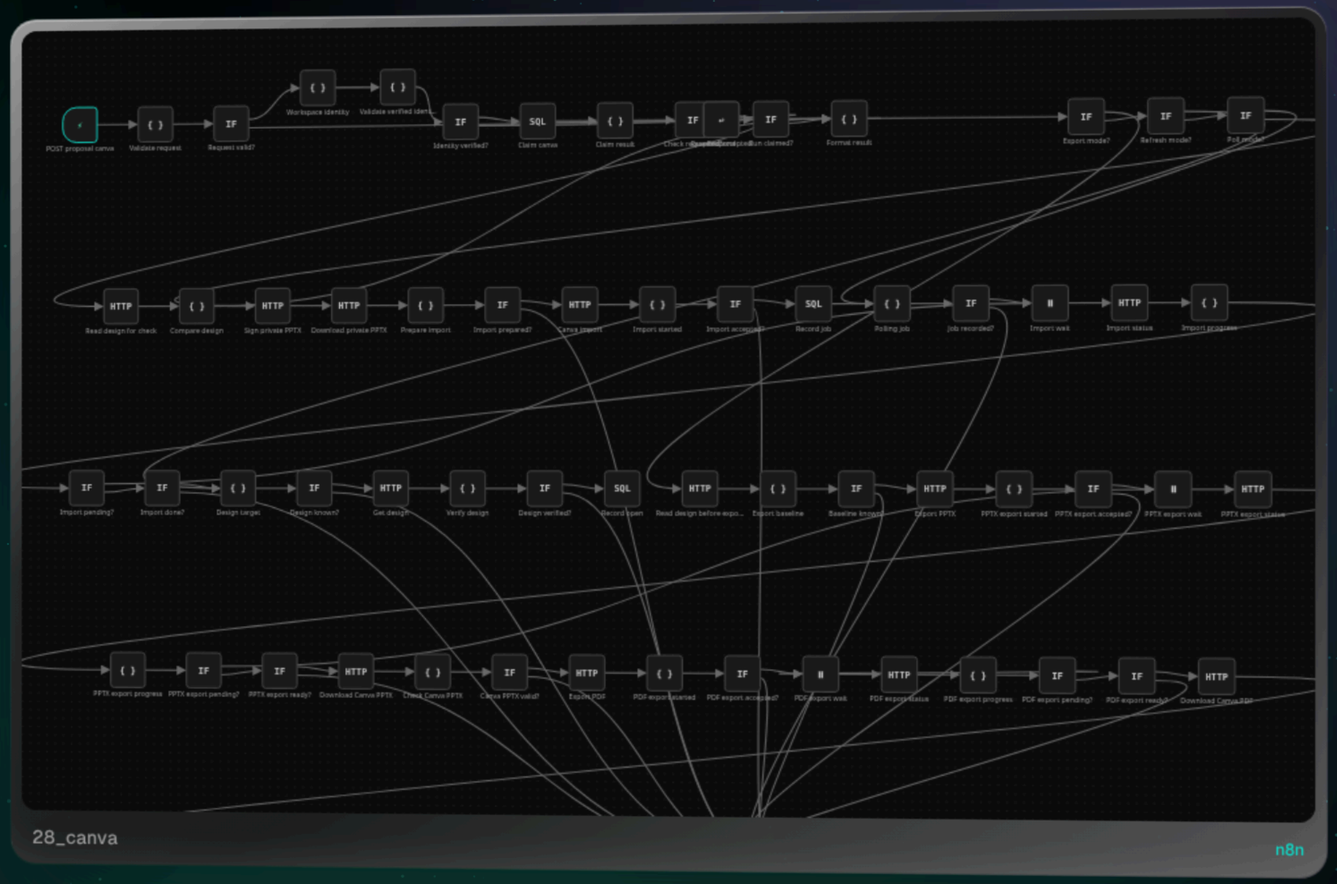

— 08

Editing in Canva

Modifier dans Canva

Import → Edit → Sync

09

Security

- Server-side keys only
- Protected webhooks
- Row Level Security
- Private storage (60 s links)
- Quotes verified against prompt injection

Every public tender
is a race against
the deadline.

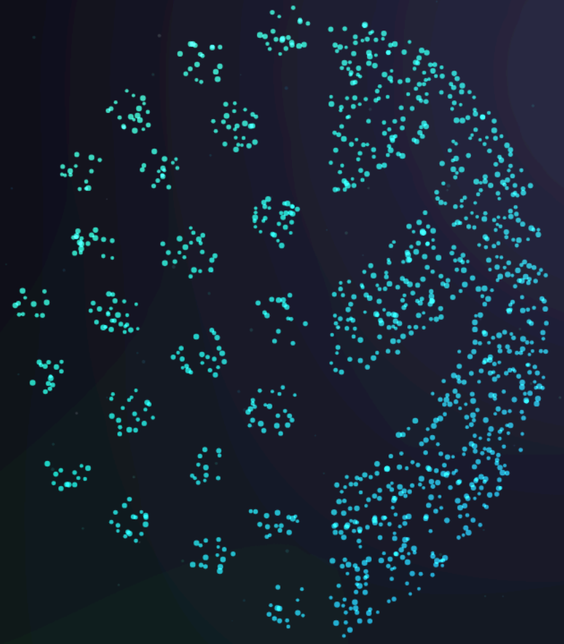

Next steps

01 OCR for scanned PDFs

02 Individual accounts and roles

03 Evaluation on OliveSoft's real CVs

04 Monitoring and alerts

Thank you
